

Manufacturer Direct

**NEW
EASY INSTALL
EDITION**

Wheel Nut Management System

Manufactured from no-break polypropylene to ensure install & removal times take only seconds to complete

Ultra violet protection to insure long life

Many design features incorporated to provide added strength

Lifetime limited warranty

Not susceptible to weather or road salt

Easy installation & removal

New Updated Flagging Hole not affected by dirt.

Locking post has an added radius to handle abuse

Typically the product pays for itself in just one wheel retorque!

Reducing down time for vehicle & operator

Eliminating the need for costly re-torque programs

Lowers your corporation's safety liability

With the Safe-T-Loc™ wheel nut management in place, the system, locks and flags the wheel nuts upon clamping force loss. A flagging hole on the Safe-T-Loc™ alerts the operator that the wheel nut requires attention.

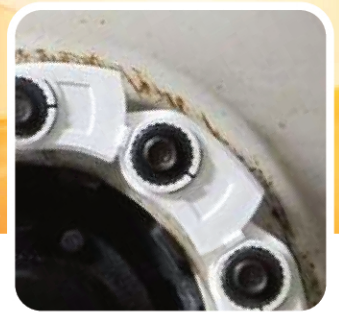

Available in various colours and capped versions

If the "Safest Fleet" in North America 10 years in a row has trusted their wheels to Safe-T-Loc each and every year...

Why not you?
